

Welcome to Digital Precision, your **virtual dental laboratory**.

Step into the future:
from simple to complex cases, **Digital Precision** - today's Virtual Dental Laboratory!

Online

case submission
digital prescription
impression upload
progress tracking
case and order history

Precision Digital is expertly qualified to assist clinicians who utilize **digital impression** systems. The lab employs computer-aided technology in nearly every step of production, ensuring that prescribed restorations are consistently well-fitting and able to be fabricated from the most modern materials.

Digital Precision is recognized in the national media and professional journals as a premier lab, which is exactly why **discerning dentists** nationwide are turning to Digital Precision. At Digital Precision you will find a team of Digital Design experts that understand and offer the best of today's cutting edge technology.

With State of the Art **Digital Smile Design** Software, Digital Precision has the unique capability of digitally designing cases for all of your dental needs. Utilizing all disciplines of dentistry, we can digitally design any case with cephalometric, CBCT, and STL technologies in order to help assist **Oral Surgeons, Periodontists, Orthodontists, Prosthodontists and General Dentists**.

With many years of experience and under the direction of an on staff Prosthodontist, you can have the confidence in our collaborative system and, together, we can plan your cases together as a team.

Visit our website today, create an account and start sending your digital cases via our Hippa compliant platform to Digital Precision.

Everything Digital. Everything Dental
