

## Metal base frame for Stackable Immediate Load

[www.3dprecisiondigital.com](http://www.3dprecisiondigital.com)

**3DP Guided Prosthetics** changes the way other systems have traditionally worked in the past. Our full mouth implant surgical guides and immediate protocol increases accuracy and precision. From conventional or digital records, and a CT scan, 3DP created a virtual surgery with start guides, bone reduction guidance, osteotomy guide, milled PMMA immediate provisional, and a second pick up device to transfer all records for the restorative conversion. You are going to Love it!!

\*Actual cases completed by 3DP and Digital Precision

### Key Benefits:

- Guided bone reduction, implants & PMMA prosthetic
- Available for most all implant systems
- Digital Smile Design Preview- Approve the Smile before surgery.

**3DP Guided Prosthetics offers a wide variety of Surgical Guides. Call today to discuss your next case!! 800-574-0721**

- Reduces chair time down to 2-3 hours per arch
- Surgical placement guide design allows for irrigation and improves visualization
- Preplanned prosthetic space for restorative longevity

**Per Arch Includes:**  
**\$6250**

**\$2950** per arch includes:  
Everything in 3DP Complete  
minus the Final Restoration & Jigs

- Digital Smile Design and Implant Planning Creation
- Live online Go-to-Meeting for case review and approval
- 3DP surgical guides with metal base/bone reduction guide and immediate-load PMMA prosthesis
- Printed Try In- Prototype for final restoration
- Implant model
- 3DP Jig- Used to orient angled multi-unit abutments
- **Final Monolithic Zr. Zurick Bridge or Montreal Bar**

## Additional Restorative Options:

[www.3dprecisiondigital.com](http://www.3dprecisiondigital.com)

**Zurick Bridge**  
w/individual crowns

Zirconium substructure with: individual crown preps and individual e.max or zirconia crowns. Gingival is layered ceramics in order to provide the most esthetic result possible.

**Zurick Bridge**  
Cutback and Layered

Full contour Prime zirconia with porcelain layered in the aesthetic zone. Gingival is ceramic and all functional areas are solid zirconia.

**Zurick Bridge Ti**  
w/ individual crowns

Titanium substructure with individual crown preps that are opaqued and individual e.max or zirconia crowns. Gingival architecture is composite.

**Pekkton Bridge**  
w/individual crowns

To meet the demanding biomechanical criteria of prosthetic solutions ask for Pekkton® (PEKK): This high performance polymer serves as a implant substructure and supports

**Montreal Bar**  
Ti Bar w/ Denture Teeth

Our Traditional Hybrid option that includes:  
Titanium bar wrapped with acrylic and finished with nano hybrid

**Zurick Bridge**  
w/ Titanium Bar

For the maximum in strength and beauty, we offer our full contour Prime zirconia with layered ceramics in the aesthetic zone. We then add the strength of a titanium bar that fits intimately with the zirconia overlay. The Gingival and all functional areas are solid zirconia. **(also made**

**Zurick Bridge**  
Monolithic Zirconia Included w/  
3DP Guided Surgery Complete
